

Student Assistant Job at the Interactive Media Lab Dresden

We are looking for Student Assistants (SHK/WHK) for Mixed Reality Development in Unity

Mixed Reality (AR/VR) technologies bring new possibilities for collaborative data analysis scenarios. In this context, we are interested in the development of visualization & interaction techniques in areas such as 3D avatars for remote users, human motion visualization, and mixed-presence collaboration support.

Requirements

- ▶ Practical experience in C# and the Unity engine
- ▶ Interest & experience in 3D computer graphics and/or Mixed-Reality development
- ▶ Good communication skills, fluent in English or German

We offer

Paid SHK or WHK contract at TU Dresden
Flexible working hours and contract length
Work on an interesting research topic
Experience with state-of-art MR devices

Interested? Contact us!

About the Lab

The Interactive Media Lab at the Technische Universität Dresden is conducting research in the field of multi-modal Human-Computer Interaction and Interactive Information Visualization. Our research is focused on how we can interact in a natural way with data and visualizations in multi-device environments and mixed reality settings.
